Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Amendment, filed on 9/26/05.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Response to Amendment

Amendment, filed on 9/26/2005 has been considered and entered.

Amendment of title is acknowledged.

Amendments of drawings are approved and overcome the objections to the drawings.

Claims 1, 7 & 15 have been amended. Claims 5-6 & 21-24 are cancelled.

New claims 25-28 are added.

Applicant's amendment of claim 1 overcomes the rejection of claims 1-4 & 7-20.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Sano et al. (US 6870316).

Art Unit: 2879

Regarding claim 25, Sano et al. disclose a plurality of bar-like ribs positioned on the rear substrate extending in a first direction (Fig 16A & Fig 10), a plurality of first discharge space (27) is defined by front substrate, rear substrate and two adjacent bar-like ribs 29 (see Fig 1), plurality of first discharge space (Fig 10) comprises a plurality of first regions (regions containing electrode X, Y), and a plurality of second regions, and each of first region comprises two sub-pixels.

Regarding claims 26 & 27, Sano et al. disclose that the first region and second regions are interlaced (a plurality of second regions located between adjacent first regions) and the first region is larger than second region (second region has a smaller area than the first region (regions not containing X, Y)).

Regarding claim 28, Sano et al. disclose that the sub-pixels are arranged like delta (lines 50-52 of column 5).

Allowable Subject Matter

Claims 1-4, 7-20 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the prior art of record neither shows nor suggests a plasma display comprising all the limitations set forth in claim 1, particularly comprising a plurality of first discharge space defined by first closed rib unit and each of the first discharge spaces comprising at least two of the sub-pixels.

Claims 2-4 & 7-20 are allowed for the same reason as claim 1 for their dependency status from claim 1.

Response to Arguments

Applicant's arguments, filed 9/26/05, have been fully considered but they are not persuasive.

Applicant's presented new claim 25 basically includes all the limitations of claims 21-23.

Further, Applicant's arguments regarding claim 25, fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

However, examiner contends that the prior art of Sano et al. teaches all the limitations set forth in claims 25-28.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
